

THEMED VIDEO CHAT

Meet with your team on video chat weekly and add some fun by making each call themed (70s, 80s, movies, animals, etc.).

SCAVENGER HUNT

Make a list of things around the home (can be dance / school specific or generic). Have team do at the same time and the first person to find all of the items wins.

SENIOR SHOUT OUT

Dedicate a video call to the seniors and share favorite memories involving them.

NAME THAT MOVIE

One teammate shares their favorite dance related movie line. The first person to guess correctly will be the next to share.

NAME THAT TUNE

The coach will play a song for the team to listen to for two or three seconds. The first teammate to guess the song gets a point. The teammate with the most points at the end of the game wins.

DIDDY CHALLENGE

Each member choreographs four 8-counts to no music and submits a video. All team members and coaches will watch and vote for their three favorites. The top three can be used for performances for the next season.

HIGH POINT

Have each team member share what they are grateful for as well as share their high point from the day or week.

POPCORN CHOREO

Pick one teammate (or coach) to start the challenge. That person will teach one 8-count to the entire team using one of the communication tools listed above. After teaching, that person will select the next person to teach by saying "popcorn" and the teammates name. That person will teach a second 8-count, and then popcorn to another teammate. This continues until all team members have contributed. Challenge your team by having them perform all 8-counts from start to finish.

VIP

Select one team member to be the VIP that day or week. Have each teammate and coach write them a letter saying what they love about them or highlighting their strengths. Then you can either have everyone email the letters to the VIP, or you can all meet in a virtual meeting and have a few teammates read their letter out loud to the VIP.

FAMILY MASHUP

Pick your favorite routine of the year and have your team members try to teach one of their family members the dance. Have all of your dancers submit their videos and create a mashup of their performances using a simple video editing tool. Post the final product to your team Instagram and share for laughs!
