

# NOVEMBER

This activity was created for you to do together with your Unity Team and works best via zoom or any other video call platform.

- Take the team rosters from both of your teams and create an order in which each dancer and coach will take their turn.
- The first person to go will share something about themselves that incorporates a number. For example: "I have 5 siblings" or "I have traveled to 3 different states".
- The next person will take their turn and do the same.
- Continue taking turns until you make it through the every dancer and coach.
- As each dancer and coach takes their turn, keep track of the numbers they say and add the numbers together as you go.
- The goal of the game is to make it to exactly 100!
  - Every dancer and coach must take their turn
  - You can't go over 100

Good Luck!
